

**Don't leave home without your flashID...**

***Now available from your local Lions Club***

### **What is flashID?**

Developed in Australia, the flashID Emergency Identification System provides a simple and accurate means of identifying people in the case of accident, collapse, or loss of consciousness for whatever reason.

It is a portable USB device that can be plugged into almost any computer and there is no need for internet connection or access to a central database.

Information is contained in a pre-loaded and pre-formatted Word document over which the owner of the device has complete control.

The information may include:

- name & personal information
- any existing medical conditions
- any implants & medical devices
- current medications & dosage
- blood group, allergies & drug reactions
- next of kin, doctor or other emergency contacts
- recent photograph and/or title page of passport

Every model bears the distinctive flashID logo, the internationally recognised white cross against a safety green background so it may be quickly recognised by emergency services personnel.

### **Why Lions?**

Lions Clubs recognise the community value of flashID and are therefore promoting it in the tradition of service of Lions Clubs, in Australia and internationally.

## What Doctors Say

“To have available with a patient key items of medical and personal information ...would be very valuable... Good information about patients is vital to prevent or minimise adverse outcomes in their care.”

Another: “A very useful tool in the Emergency and Trauma Centre, especially when patients present who are unconscious or have an altered conscious state.”

## We all know accidents happen to other people.

But, just suppose you were participating in your favourite sport and something did go wrong.

What would happen if you were injured and unconscious? How would anyone know about any pre-existing

medical conditions, medications or allergies, or indeed what blood group you are?

Many years of experience in international motor racing lie behind the development of the patented flashID Emergency Identification System.

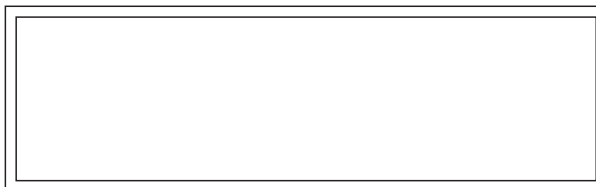

Key amongst the lessons learned in motorsports is the importance of accurate and timely medical information being available because, in an emergency, *every minute counts*.

**Now, the security of a flashID device can be yours for just \$55 RRP including GST. Three models: one price.**

***Don't delay! To obtain your flashID or find out more, contact the Lions Club below.***

***After all, the life it saves could be your own!***
